**DETAILED ACTION**

***Election/Restrictions***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-4, 6-10, 13-31, drawn to a wireless modem, classified in class 375, subclass 222.
  - II. Claims 32-37, 39, drawn to a method of spread spectrum transmission and reception, classified in class 375, subclass 130.
2. The inventions are distinct, each from the other because of the following reasons:

Group I refers to wireless modem which transmits a baseband signal by upconverting the baseband signal and inverting the baseband signal using an inverter. Group II refers to a method of transmitting a baseband signal using spread spectrum techniques, including spreading the baseband signal using a spreading code, and receiving a baseband signal using spread spectrum techniques, including despreding a signal using a spreading code.
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Art Unit: 2634

4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
